

Reading nonwords

- **Perry et al (2014)**

Reading 70 (28) nonword by 32 french participants

Final consonants are most of the time not pronounce in French

> GPC rule is then not to pronounce them

But participants were often pronouncing them in nonword

> correctly reproduced by CDP++ , not by DRC

DRC is quantitatively better but qualitatively weaker

(problems with nonwords that are not pronounced regularly)

Spelling-sound regularity

A word has a regular pronunciation if its pronunciation can be **derived entirely from the grapho-phonemic conversion rules**, which are based on the statistically most plausible pronunciation.

IRREGULAR

VILLE

PINT

HAVE

CHEF

REGULAR

FILLE, QUILLE, BILLE

MINT, TINT ..

GAVE, SAVE, RAVE

CHOP, CHALLENGE
