

Connectionist Dual Process + (CDP+)

Hybrid model : CDP model with DRC's lexical route and a connectionist approach of the non lexical route.

○ Perry et al (2007)

How to evaluate them ?

- **Accuracy and Speed of reading**

for models :

- phonological output
- number of processor cycles to produce it

- **Evaluate their simulation performance of some effects observed in human reading**

- **Evaluate theoretical choices that lead to their design and their objectives**
