

Code chunk options

eval = FALSE

- ▶ The code will not be evaluated. This is a useful way to incorporate code that you want to run manually

include = FALSE

- ▶ The FALSE value prevents code and results from appearing in the finished file. For things you want to run silently

echo = FALSE

- ▶ The code will not appear in the finished file, but the results will. This is a useful way to embed figures without sharing the code that generated it

+ see the many options in the Rmarkdown reference document

Most common chunk options - summary

Option	Default value		Code evaluated	Code appear in the finished document	Results appear in the finished document
eval	TRUE	IF set to FALSE:	No	No	No
include	TRUE	IF set to FALSE:	Yes	No	No
echo	TRUE	IF set to FALSE:	Yes	No	Yes
