1. **Create a new repository on Github**

• Go to github.com, click on the button [🖥 New] on your homepage.
  The button [🖥 New] is also available on the 'Repositories' page

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? **Import a repository.**

Owner *   **Repository name** *

🟤 aherbay ▾ / lab_retreat_march_2022 ✓

Great repository names are short and memorable. Need inspiration? How about **animated-invention**?

Description (optional)

Files for the lab retreat coding workshop

⚪ 🖥 **Public**
      Anyone on the internet can see this repository. You choose who can commit.

🔵 🔒 **Private**
      You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

☑ **Add a README file**
    This is where you can write a long description for your project. **Learn more.**

☐ **Add .gitignore**
    Choose which files not to track from a list of templates. **Learn more.**

☐ **Choose a license**
    A license tells others what they can and can't do with your code. **Learn more.**

This will set ⑂ main as the default branch. Change the default name in your **settings.**

Create repository
