Start tracking changes in a folder = git init

= initiate a git repository in your folder
### ~ get a new empty photo album

init

git init

Select the files that will be included during the next update of the tracking system

= git add

= **stage the file on the list of files to be included in the next commit**

~ select the pictures to add to the album

LIST OF PICTURES
TO PUT IN THE ALBUM
= the stage (in git language)

add

= the local repository (in git language)

= the working directory
(In git language)

or

```
git add filename.R
git add .   to add all files in the folder
```
