# Select the files that will be included during the next update of the tracking system

**= git add**

= stage the file on the list of files to be included in the next commit

*~ select the pictures to add to the album*

LIST OF PICTURES
TO PUT IN THE ALBUM
= the stage (in git language)

add

= the local repository (in git language)

= the working directory

(In git language)

```
git add filename.R
```
or
```
git add .
```
to add all files in the folder

# Update the tracking repository with the files selected and with a descriptive message = `commit`

## = incorporate the file inside the local repository

*~ glue the pictures to the album and write a date and description*

LIST OF PICTURES
TO PUT IN THE ALBUM

commit

```
git commit —m "here I explain what changed"
```
