Create Web Applications

Shiny R

- Create small (or big) applications that allow you to interact with you data

- You need to define:

  - To load your data & libraries

```
library(shiny)
library(tidyverse)
library(kableExtra)

scores_all <- read.csv("scores_all.csv")
spass_pretest_sentence_eval <- readRDS("spass_pretest_sentence_eval.RDS")
```

  - A structure of your user interface (UI)

  - Some functions in your server (server)

  - To bind your UI and Server

```
# Run the application
shinyApp(ui = ui, server = server)
```
