THE HEADER

Anatomy of a header

- The header is in the YAML format

- It defines the general properties of your target file depending on its format:

    - Table of content: toc, toc_float, toc_depth

    - Plots default size: fig_width, fig_height

    - CSS Themes: theme

    - Code folding options: code_folding = hide

        - See the R Markdown reference document
