Create a project in RStudio

Project in R Studio

1 **Click on RStudio > New Project**
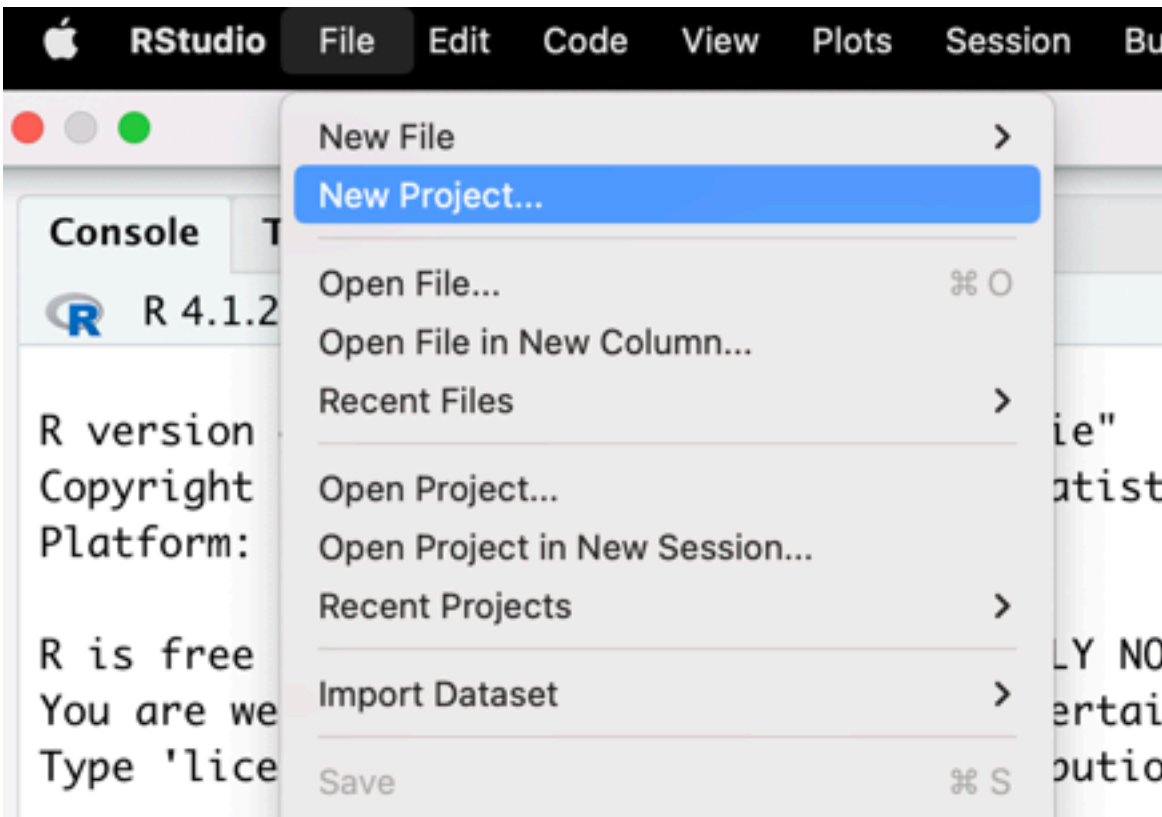

2 **Save or not your Workspace**
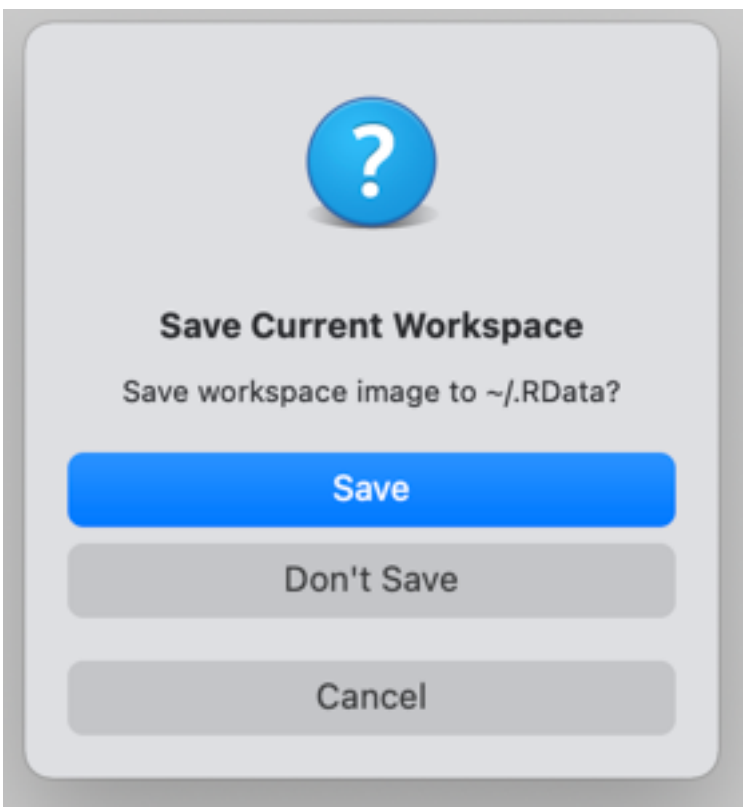

3 **Select 'New Directory' or 'Existing Directory'**

depending on if you want to create a new directory for your project or if you already have one

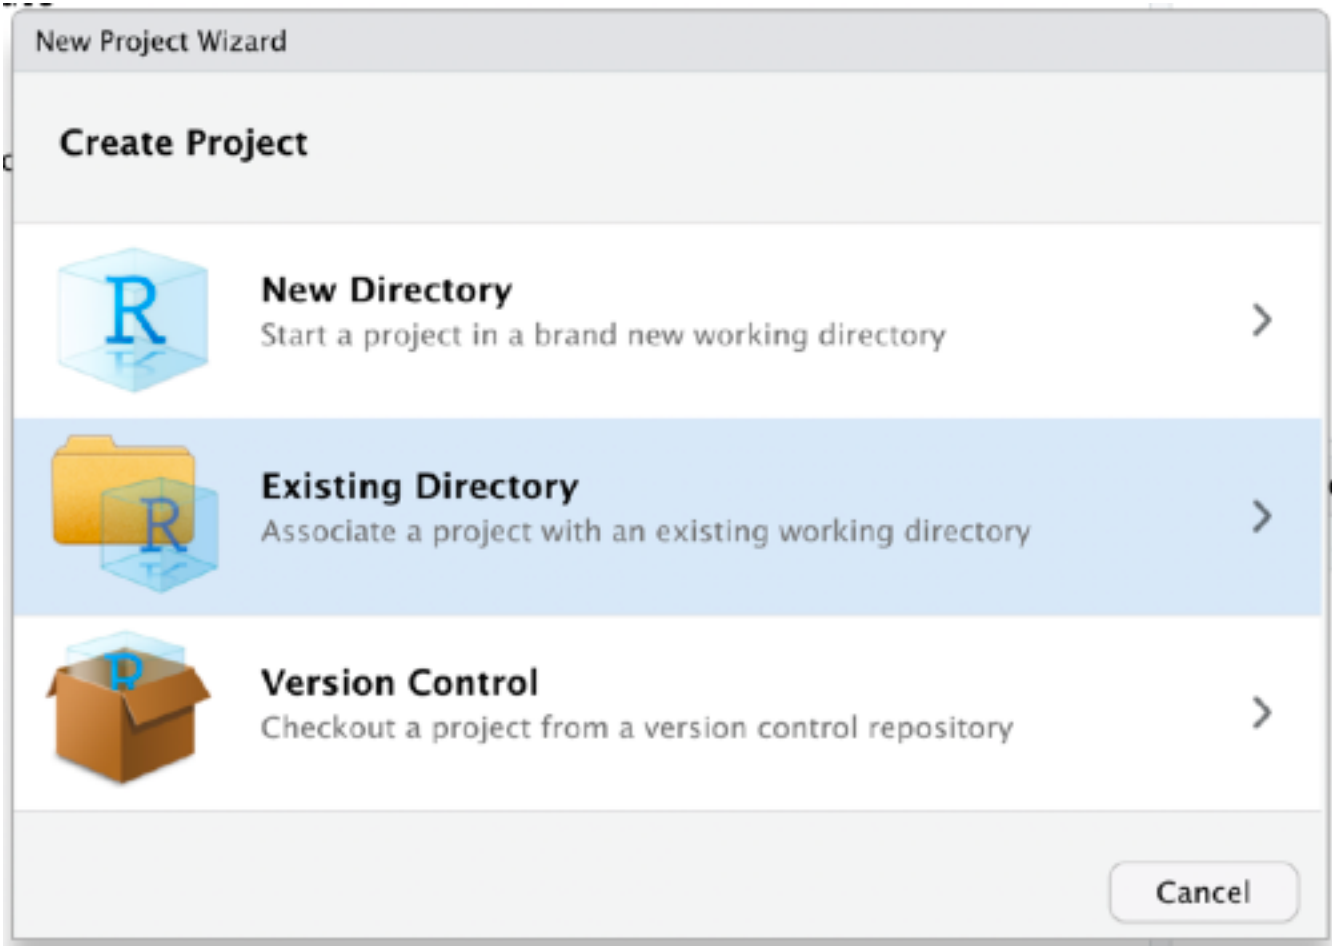

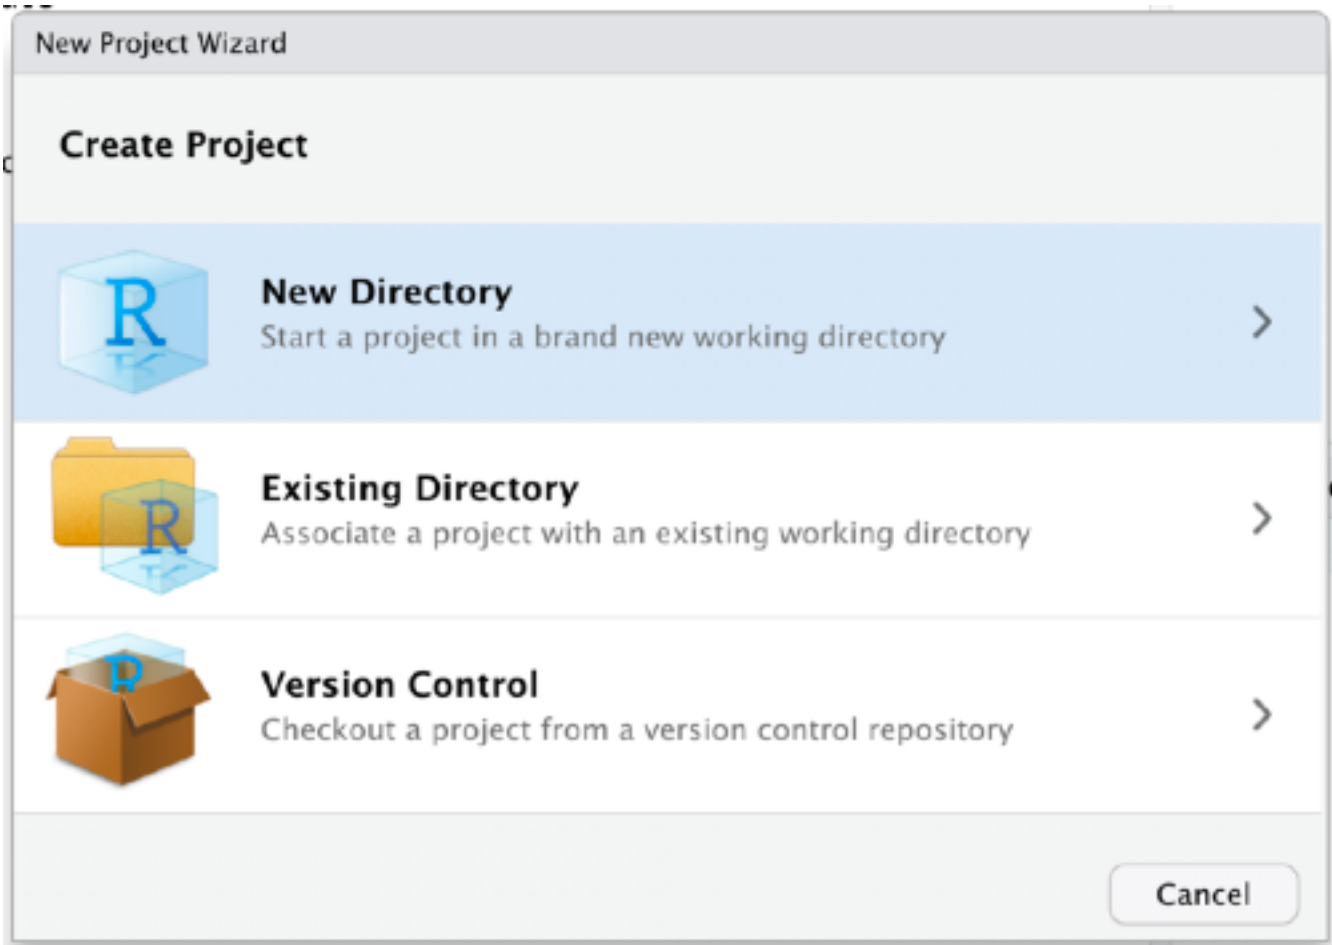

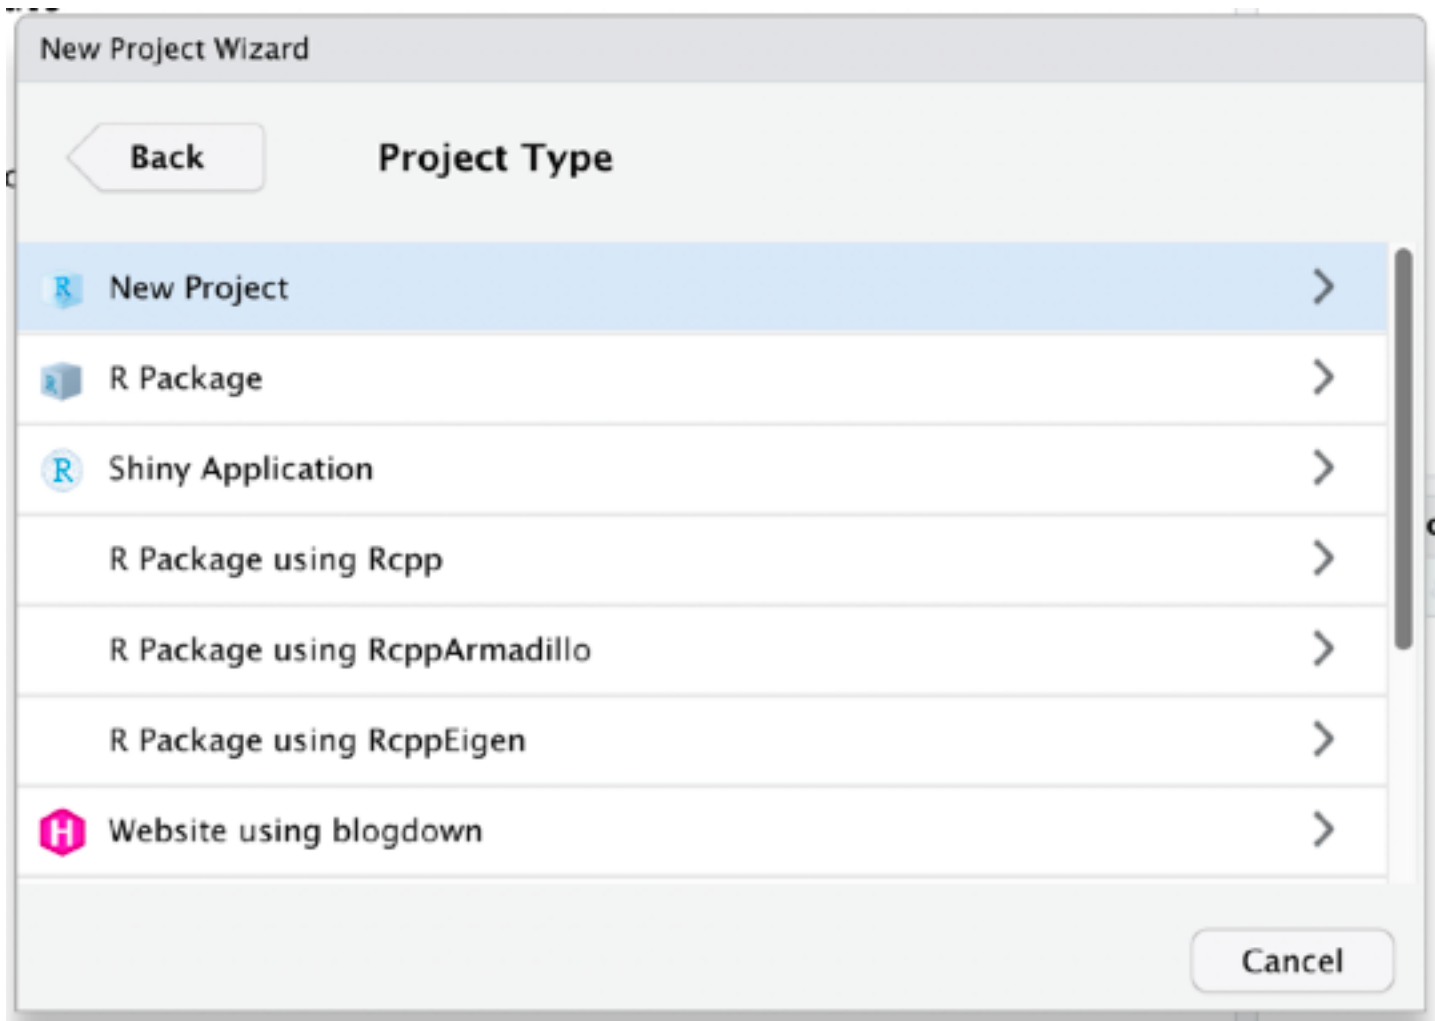

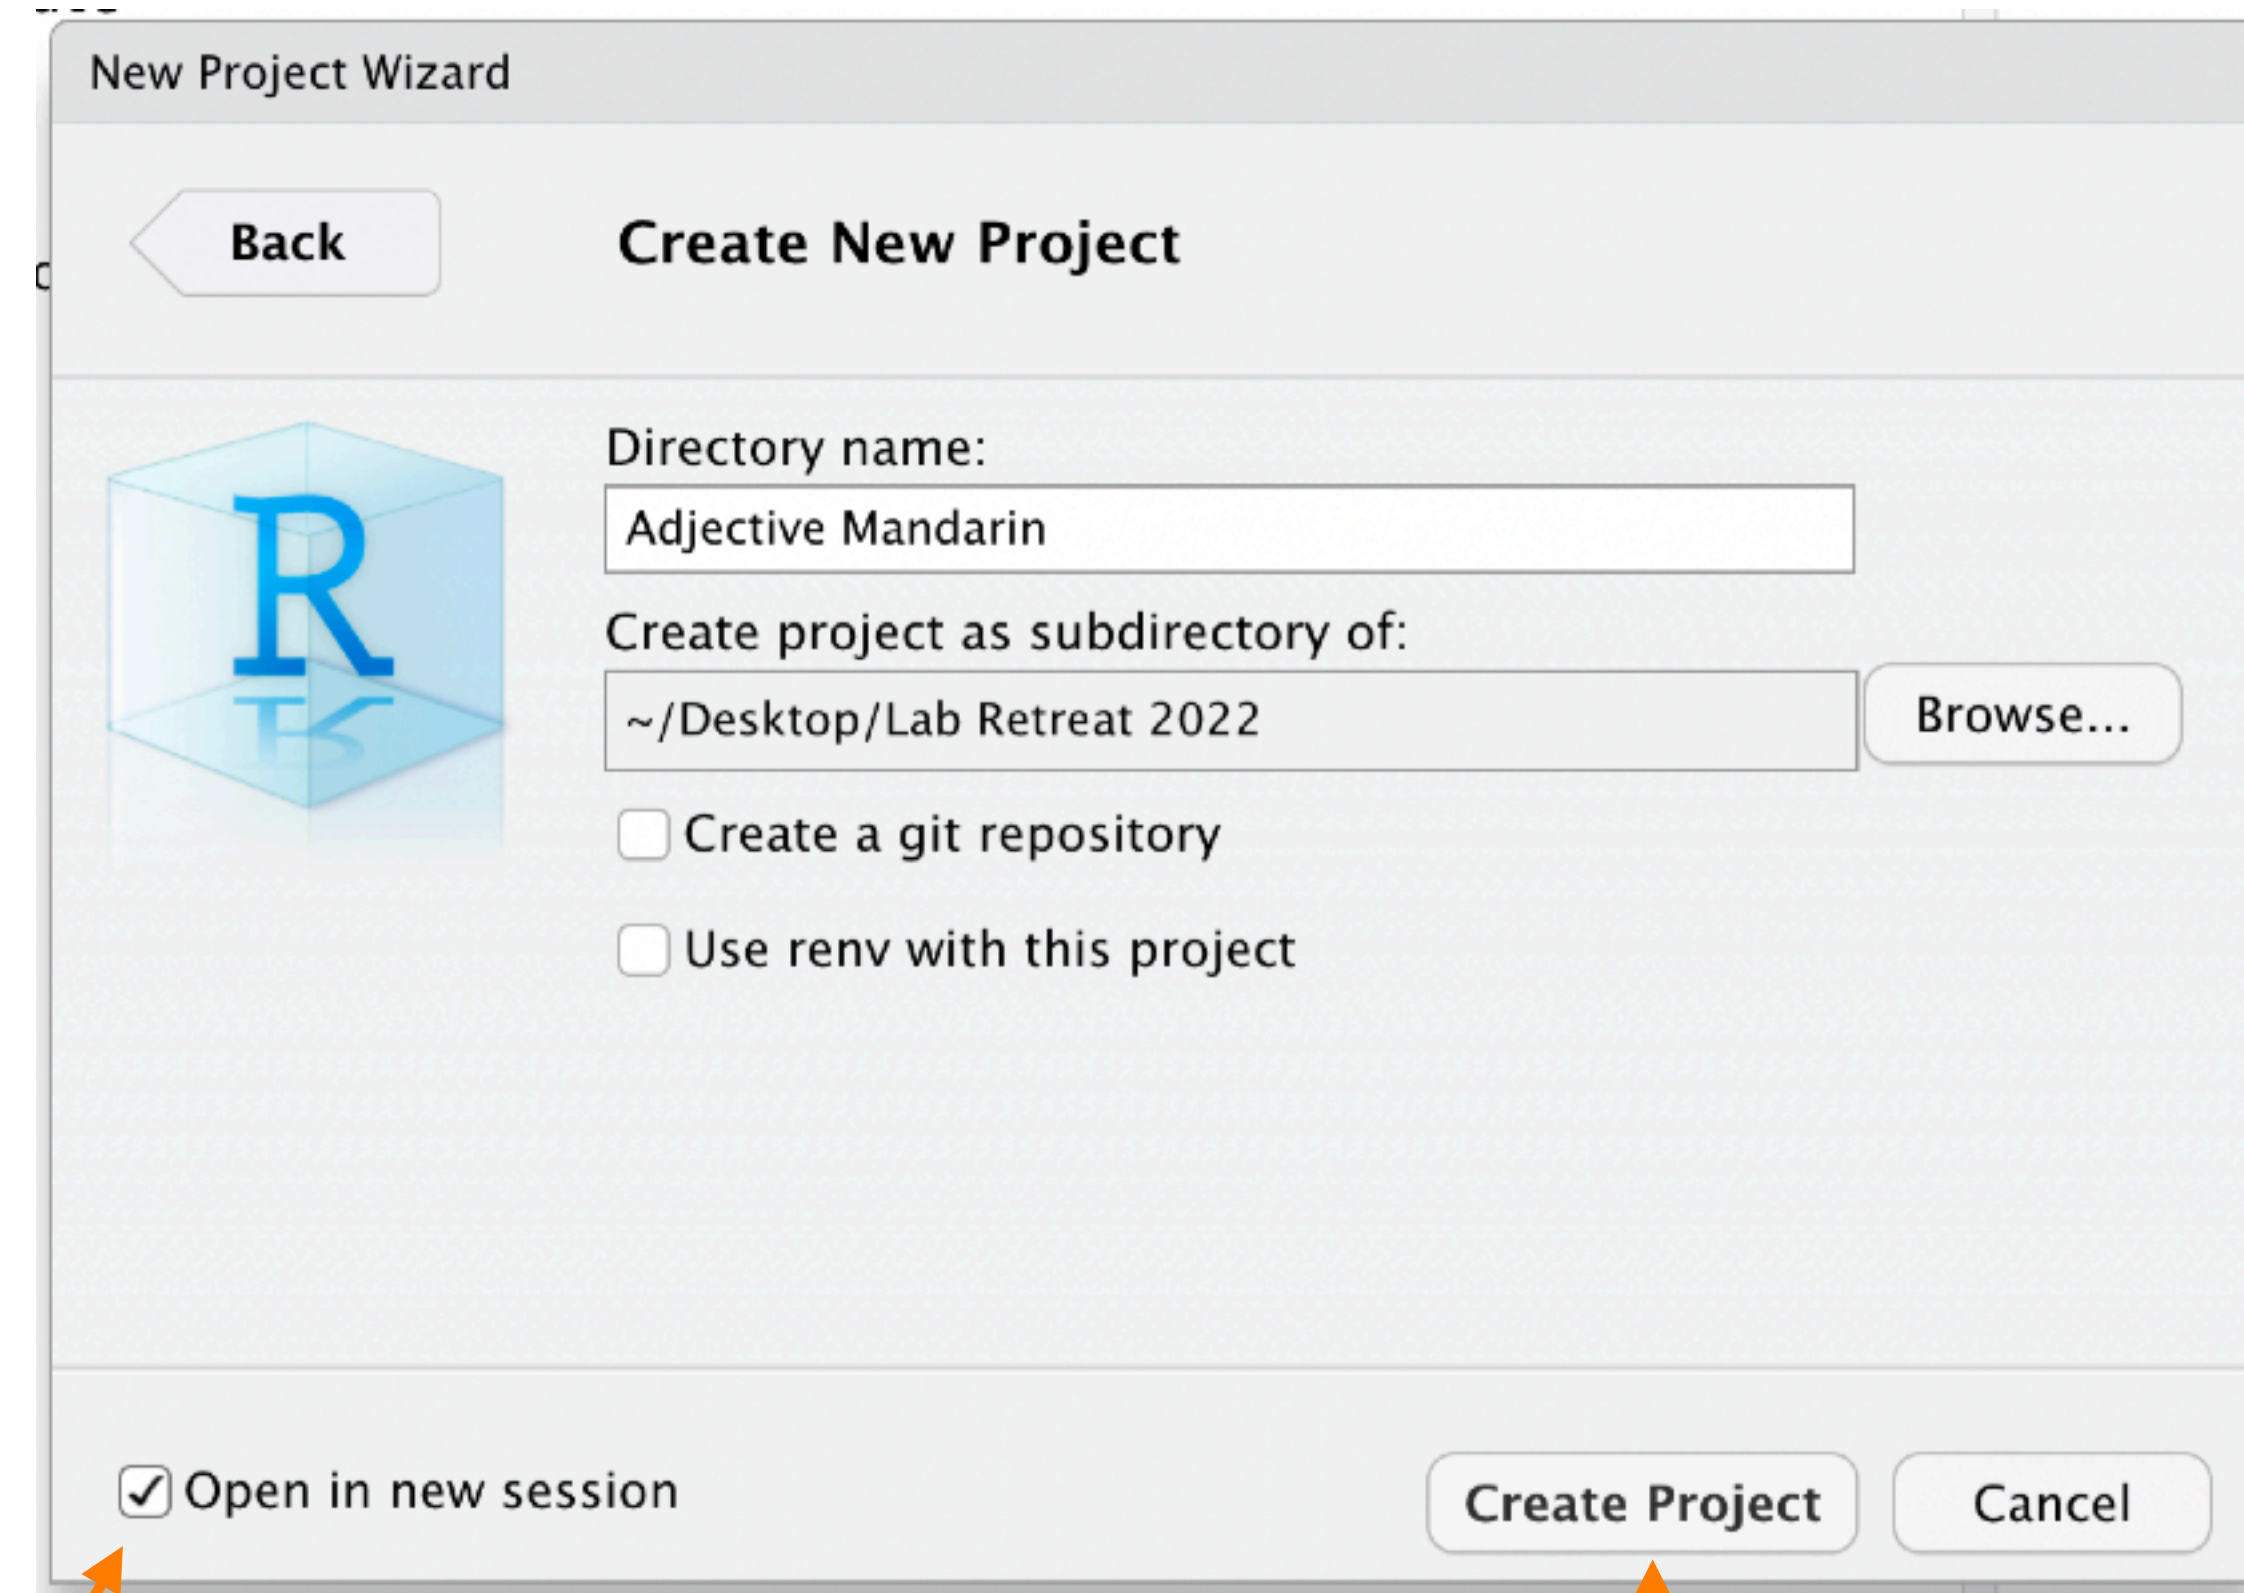

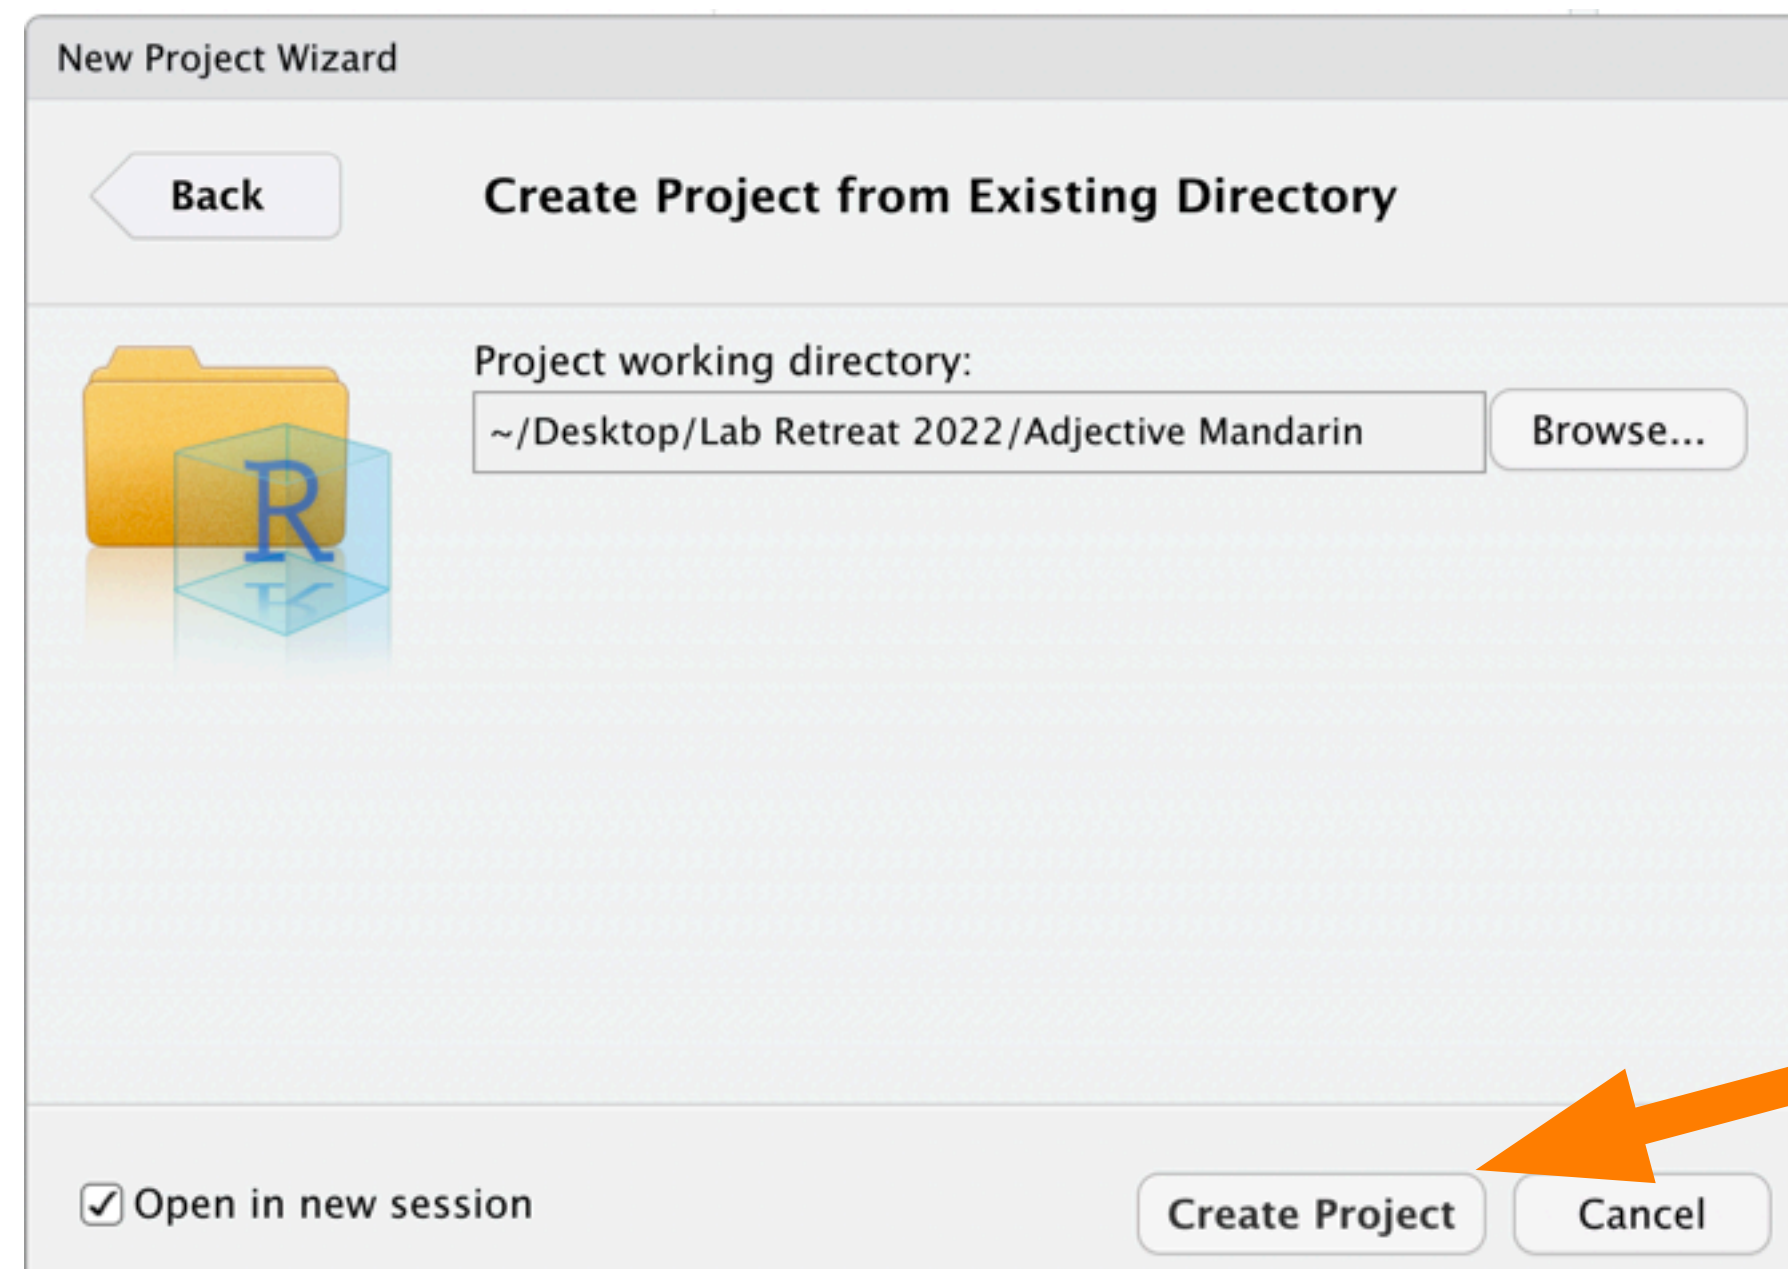

4 **Select 'New R Project'**

Create a project in RStudio

Project in R Studio

5 If you selected 'New directory', define your R project location by defining:
- the directory name
- It's location

If you selected 'Existing directory', choose the existing directory in which the project will live:

New Project Wizard

Back — **Create Project from Existing Directory**

Project working directory:

~/Desktop/Lab Retreat 2022/Adjective Mandarin   **Browse...**

☑ Open in new session   **Create Project**   **Cancel**

New Project Wizard

Back — **Create New Project**

Directory name:

Adjective Mandarin

Create project as subdirectory of:

~/Desktop/Lab Retreat 2022   **Browse...**

☐ Create a git repository

☐ Use renv with this project

☑ Open in new session   **Create Project**   **Cancel**

If you want to keep your existing R session open, check this box

6 And click 'Create Project'
